👤 Professional Summary

Final-year Bachelor of Technology graduate in Artificial Intelligence and Data Science with experience building predictive models, Natural Language Processing applications, and interactive analytics dashboards using Python, Machine Learning, and Power BI. Seeking an entry-level role in Data Science, Analytics, or Machine Learning.

📁 Experience

Artificial Intelligence and Machine Learning Intern May 2026 – Present
CodeTrade India Private Limited Remote

- Engineer end-to-end machine learning pipelines for predictive modeling and Natural Language Processing classification, applying feature engineering, text preprocessing, and model evaluation within a structured, production-grade Machine Learning training program.

Cloud Lead Sep 2025 – Present

- Google Developer Groups on Campus, Arya College of Engineering and IT
- Coordinate technical events and student engagement initiatives for Google Developer Groups on Campus, including a Google Cloud Study Jams program and an AI/ML workshop reaching 350+ students, to drive cloud and ML skill-building.

🎓 Education

Arya College of Engineering and Information Technology Aug 2023 – Jun 2027
Bachelor of Technology in Artificial Intelligence and Data Science Jaipur, Rajasthan, India

- Affiliated to Rajasthan Technical University
- GPA: 8.58 / 10

🧠 Skills

Programming Languages

Python, SQL, Java, C

Data Analysis & Visualization

NumPy, Pandas, Matplotlib, Seaborn, Power BI

Tools

Git, GitHub, Visual Studio Code, Jupyter Notebook

Machine Learning & Data Science

Linear Regression, Logistic Regression, Scikit-learn, Exploratory Data Analysis, Predictive Modeling

Databases & Cloud

MySQL, MongoDB, Google Cloud Platform

📁 Projects

Human Resources Analytics Dashboard May 2026 – May 2026

- Built an end-to-end Human Resources analytics dashboard in Power BI (Power Query, DAX) on 1,480 employee records, designing interactive DAX measures to identify key attrition drivers and automate executive reporting.

- GitHub Link : <https://github.com/harrsh-here/HR-Analytics-PowerBI-Dashboard> 

Movie Recommender System

Mar 2026 – Mar 2026

- Built a content-based movie recommendation engine using Python (Pandas, Scikit-learn, NLTK), applying TF-IDF vectorization and cosine similarity on the MovieLens-100K dataset (1,682 movies, 100,000+ ratings) to serve real-time top-N recommendations.

Certifications & Achievements

HackerRank

- 5-Star Gold level in Python with 435+ points
- Achieved 3-Star Silver level in SQL with 305+ points
- Earned Bronze level (50+ points) in Java fundamentals

D3CODE Hackathon

- Secured Top 10 position out of 30,000+ competing teams

NPTEL(National Programme on Technology Enhanced Learning)

- Problem Solving Through Programming in C,
- Database Management System (Elite),
- The Joy of Computing using Python (Elite, 93% overall score)

Extracurricular Activities

- Participated in GameCon 2024 (E-Sports event)
- Participated in Scintillations 2024 (Technical Exhibition)
