## SUMMARY

Third-year Bachelor of Technology student in Artificial Intelligence and Data Science with a strong interest in data-driven problem solving. Seeking internship or entry-level opportunities in Data Science roles to gain hands-on industry experience and contribute meaningfully to real-world projects.

## EDUCATION

|                                                                    |           |
|--------------------------------------------------------------------|-----------|
| Bachelor of Technology in Artificial Intelligence and Data Science | GPA       |
| Arya College of Engineering and I.T.                               | 8.58 / 10 |
| 08/2023 - 06/2027   Kukas, Jaipur, Rajasthan, India                |           |
| Affiliated to Rajasthan Technical University                       |           |
| Senior Secondary(XII), Science                                     |           |
| SALP Govt Senior Secondary School                                  |           |
| 07/2021 - 05/2023   Bhawani Mandi, Jhalawar, Rajasthan, India      |           |
| Secondary Education                                                |           |
| Adarsh Vidya Mandir Secondary School                               |           |
| 07/2010 - 05/2021   Guradiya Joga, Jhalawar, Rajasthan, India      |           |

## SKILLS

|                  |        |               |        |       |                           |      |     |            |
|------------------|--------|---------------|--------|-------|---------------------------|------|-----|------------|
| Java Programming | Python | C Programming | Pandas | NumPy | Exploratory Data Analysis | DBMS | SQL | Matplotlib |
|------------------|--------|---------------|--------|-------|---------------------------|------|-----|------------|

## TRAINING / COURSES

|                                                                     |                                            |
|---------------------------------------------------------------------|--------------------------------------------|
| NPTEL                                                               | Salesforce Programming Architect           |
| Problem Solving Through Programming in C Database Management System | TechForce Academy, Australia   August 2025 |

## TECHNICAL ACHIEVEMENTS

|                                                                                                                  |                                                                                                                   |
|------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
|  Python Gold Badge (HackerRank) |  SQL Silver Badge (HackerRank) |
| Achieved 5-star Gold level in Python with 435+ points.                                                           | Achieved 3-star Silver level in SQL with 305+ points.                                                             |
|  Java Bronze Badge (HackerRank) |  D3CODE Hackathon Participant  |
| Earned Bronze level (50+ points) in Java fundamentals.                                                           | Secured Top-10 out of 30,000 teams                                                                                |

## PROJECTS

|                                                                                                                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Student Placement Prediction System                                                                                                                            |
| 01/2026 - 02/2026                                                                                                                                              |
| Implemented a machine learning model to predict student placement outcomes using Logistic Regression.                                                          |
| Performed data preprocessing and feature scaling before training the model.                                                                                    |
| Developed a Flask-based web interface for real-time predictions and deployed the application on Render to understand the end-to-end Machine Learning workflow. |

## EXTRACURRICULAR ACTIVITIES

|                                                                         |
|-------------------------------------------------------------------------|
| Cloud Lead                                                              |
| Google Developer Groups on Campus, Arya College of Engineering and I.T. |
| 09/2025 - Present                                                       |
| Contributed to event coordination and student engagement activities.    |
| Supported peer learning during Google Cloud Study Jams.                 |
| Participated in GameCon 2024 (E-Sports event)                           |
| Participated in Scintillations 2024 (Technical Exhibition)              |

Date : 24/02/2026
